

Claims:

- 1、 A seat back display with a protective cover comprising:
 - a display module for mounting in a back of a chair;
 - a protective cover for covering the display module; and
- 5 a connecting mechanism formed between the protective cover and the back of the chair, wherein the protective cover is secured to the back of the chair by the connecting mechanism for covering the display module thereby shielding the display module.
- 2 、 The display as claimed in claim 1, wherein the protective cover is generally
- 10 equal to the display module in size.
- 3 、 The display as claimed in claim 1, wherein the protective cover is slightly larger than the display module in size.
- 4 、 The display as claimed in claim 1, the protective cover further comprising a pad facing the display module for contacting the display module.
- 15 5 、 The display as claimed in claim 4, wherein the pad is made of a soft material.
- 6、 The display as claimed in claim 1, wherein the connecting mechanism comprises a zipper with one part connecting with the back and another part connecting with the protective cover.
- 20 7、 The display as claimed in claim 1, wherein the connecting mechanism comprises a plurality of buttons or snaps each having one part connecting with the back and another part connecting with the protective cover.

- 8、 The display as claimed in claim 1, wherein the connecting mechanism comprises a plurality of sticky strips each having one part connecting with the back and another part connecting with the protective cover.
- 9、 The display as claimed in claim 1, wherein the protective cover has an edge
5 fixedly connecting with the back of the chair.
- 10、 The display as claimed in claim 1, wherein the protective cover is separatable from the back.
11. The display as claimed in claim 1, wherein the connecting mechanism comprises a plurality of pieces of Velcro each having one part connecting with
10 the back and another part connecting with the protective cover.
